RE: Notice of Intention to Revise Large Mining Operations,
Utelite Mine, M/043/004, Summit County, Utah

On Friday, June 9, 1989, Cardsten Mortensen and Slim Garrick came into the Division office to discuss the requirements for enlarging the Utelite Mine plan. The proposed revision area is southeast of the plant. The shale is presently being mined west of the plant.

Mr. Garrick had prepared a map showing the proposed pit. The map did not delineate a total disturbance and Mr. Garrick agreed to finish the map prior to submittal. I suggested Mr. Garrick include the plant and present pit areas on the same map. I made this suggestion for two reasons:

- 1) the relationship between the present operation and the expansion areas will be easier to visualize;
- 2) the current map we have for the present operation is incomplete. The scrap pile, at least one waste dump, and a definitive disturbance boundary have not been delineated on the map. Updating this map and including the proposed revision will make this operation easier to understand.

Mr. Mortensen suggested the Division pay for the generation of the map.

Mr. Garrick and Mr. Mortensen both agreed that the proposed revision area will not be suitable for a county landfill. Therefore, complete reclamation of the proposed revision area will be required.

I gave Mr. Garrick a copy of the new rules and a form
MR-REV.
